INFRASTRUCTURE

Recruitment for the infrastructure industry

The immense Infrastructure and real estate industry measures the vertical growth of any economy. Although semi-organised, the sector employs large numbers from skilled personnel like civil and mechanical engineers and architects to per-day wage construction workers and the like. The need for skilled workers grows in the mammoth industry as it receives patronage from foreign investors, boosting an already upward trend in the industry.

How Proctor Helped/Proctors Role

Proctor’s research team have learned and applied the **technical knowledge** to help identify the perfect matched candidates in **Middle and Senior Level Management** position across a spectrum of companies. From large family owned construction groups to Infra-engineering conglomerates to one of the biggest engineering company in Europe for their Indian operation. Most of the assignment taken up by us here were a first-time experience for us and we rose to the occasion by spending hours understanding the technical nuance of the roles and buttoning down the skills set required to excel in

them. Needless to say we won clients who continue to work with us tilldate and are happy to refer our services in the Infrastructure and engineering space.
